

## ← Software - Install the System76 Driver

[edit on github](#)

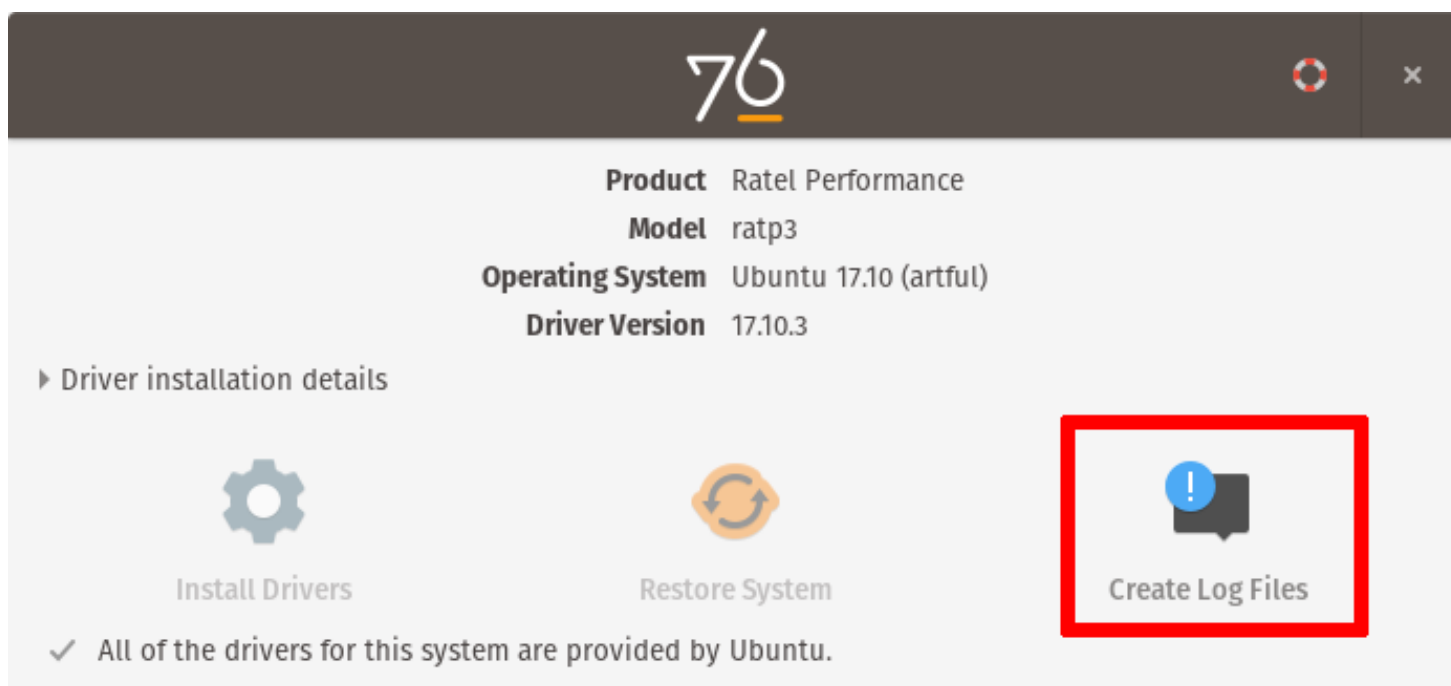

### System76 Driver

To install our Driver you need to run the following commands in the Terminal:

```
sudo apt-add-repository -ys ppa:system76-dev/stable
sudo apt-get update
sudo apt-get install -y system76-driver
```

### Generate Log Files

Simply clicking the button outlined in red will create a file called 'system76-logs.tgz', it will be placed in your Home directory (/home/username)

### System76 NVIDIA Driver

Follow the above steps as well as this additional command:

```
sudo apt-get install system76-driver-nvidia
```
